

The BIG and the small!

Whoa!

In one year light can travel
9,500,000,000,000
kilometres!

The world's smallest
antelope is of the same
size as the world's
largest frog!

Argentinosaurus (the heaviest and the
longest land animal ever) laid eggs about
the size of a rugby ball!

Found you!

The giant Pacific octopus is much
larger than a human being, but its
newborn baby is only about the
size of a grain of rice!

SCALE

The ratio of any two corresponding lengths in two similar geometric figures is called as Scale.

The ratio of the length of the scale drawing to the corresponding length of the actual object is called as Scale.

The earliest and largest collection of prehistoric musical instruments was found in China and dates back to between 7000 and 6600 BC. The Hurrian song, found on clay tablets that date back to approximately 1400 BC, is the oldest surviving notated work of music.

MUSIC

COMPUTER

About 1.8 billion people connect to the Internet, only 450 million of them speak English. One of the world's leading computer and computer peripheral manufacturer Hewlett Packard was first started in a garage at Palo Alto in the year 1939.

A farmer is a person engaged in agriculture, raising living organisms for food or raw materials. The term usually applies to people who do some combination of raising field crops, orchards, vineyards, poultry, or other livestock.

FARMERS

RAKE HOE

A rakehoe is a tool used by wildland firefighters that is half rake and half hoe. The two tools are combined on the same end, so that they are on the same sheet of metal. The rake is very coarse, so can only be used for raking coarse material.
